

Thermometer Exchange

The Bad News:

Household thermometers contain mercury, a nerve toxin that can cause brain damage, birth defects, & environmental harm.

The half-gram of mercury in a thermometer is enough to pollute 5 million gallons of Bay water.

Break a thermometer and that mercury is on its way into our environment, where it can poison people & wildlife.

The Good News:

There are mercury-free thermometers that are just as accurate as the mercury ones.

Come to this thermometer exchange with your mercury thermometer in a **plastic Ziploc type bag** and receive a **FREE** non-mercury thermometer in return.

- **Sunday, April 29th, 2007**
- **8:30am - 1:00pm**
- **Los Gatos Farmers Market @ Town Plaza**

(W. Main St. & N. Santa Cruz Ave)

For more info, please contact the Countywide Household Hazardous Waste Program 408- 299-7300

The Department of Environmental Health Household Hazardous Waste Mercury Education Project is funded by a grant from the California Integrated Waste Management Board.
